

Supporting Children with Medical Needs

For Woodhall Primary School, part of the Unity Schools Partnership

Date of Review:	September 2019
It was ratified by the Woodhall Primary School Local Governing Body on:	3 rd October 2019
Date of next Review:	September 2021

Introduction

Students with medical conditions should be properly supported so that they can play an active part in school, remain healthy and able to achieve their academic potential, with full access to education and the same opportunities at school as any other child.

We recognise that pupils with long-term and complex medical conditions may require on-going support, medicines or care while at school to help them to manage their condition and keep them well. Others may require monitoring and interventions in emergency circumstances.

We also recognise that needs may change over time, and that this may result in extended absence from school. The school will make every effort to minimise the impact on a child's educational attainment and support his or her emotional and general well-being, including any necessary re-integration programmes.

Education and Health Care Plans

A pupil who has a medical condition that is long term with acute episodes, requires on-going support, and involves the need for medication and/or care whilst at school must have an Individual Healthcare Plan.

The Headteacher will be responsible for developing Healthcare Plans. Their purpose is to ensure that they provide clarity about what needs to be done, when and by whom. They will often be essential, such as in cases where conditions fluctuate or where there is a high risk that emergency intervention will be needed, and they are likely to be helpful in the majority of other cases, especially where medical conditions are long-term and complex. However, not all children will require one. The school, healthcare professionals and parents should agree, based on evidence, when a healthcare plan would be inappropriate or disproportionate. If consensus cannot be reached, the Headteacher is best placed to take a final view.

Individual healthcare plans, and their review, may be initiated, in consultation with the parent, by a member of school staff or a healthcare professional involved in providing care for the child. Plans will be drawn up in partnership between the school, parents, and a relevant healthcare professional, e.g. Specialist or community nurse. Wherever possible, the child will also be involved in the process. The aim is to capture the steps which a school should take to help the child manage their condition and overcome any potential barriers to getting the most from their education. Responsibility for ensuring the plan is finalised rests with the school.

The individual healthcare plans are reviewed at least annually, or earlier if evidence is presented that the child's needs have changed. The plans are devised with the child's best interests in mind, ensuring that an assessment of risk to the child's

education, health and social well-being is managed well so minimising disruption. Reviews will be linked to any education healthcare plan the child may have.

Individual Healthcare Plans must:

- Be clear and concise.
- Be written in partnership with parents, child, healthcare professional and key staff.
- Be reviewed annually or when there is a change in the condition of the child.
- Be easily accessible whilst preserving confidentiality.
- Outline educational provision if the student is unable to attend school.
- Contain details of the medical condition, its triggers, signs, symptoms and treatments.
- Include relevant SEN information.
- Provide details of the student's resulting needs, including medication (dose, side-effects and storage) and other treatments, time, facilities, equipment, testing, access to food and drink where this is used to manage their condition, dietary requirements, modifications to buildings, furniture or equipment, and environmental issues e.g. crowded corridors, travel time between lessons.
- Outline specific support for the student's educational, social and emotional needs – for example, how absences will be managed, changes to the school day and details of a personalised curriculum, requirements for extra time to complete exams, use of rest periods or additional support in catching up with lessons, counselling sessions etc.
- Outline the level of support needed, (some children will be able to take responsibility for their own health needs), including in emergencies. If a child is self-managing their medication, this should be clearly stated with appropriate arrangements for monitoring.
- State who will provide this support, their training needs, expectations of their role and confirmation of proficiency to provide support for the child's medical condition from healthcare professional; and cover arrangements for when they are unavailable.

It will be the responsibility of all staff to ensure that the plan is followed.

The healthcare plan is a confidential document. The level of detail within will depend on the complexity of the child's condition and the degree of support needed. Where a child has a special educational need, but does not have a statement or EHC plan, their special educational needs will be mentioned in their individual healthcare plan.

Roles and Responsibilities

Supporting a child with a medical condition during school hours is not the sole responsibility of one person. The school will work collaboratively; both with staff within the organisation and with outside agencies, as the circumstances of each child dictate.

1. The Governing Body

The Governing Body will ensure that pupils in school with medical conditions are supported. It will ensure that a policy is developed, implemented and monitored. The Governing Body will ensure that staff receive suitable training and that they are competent before they take on the responsibility to support children with medical conditions.

2. Headteacher

The Headteacher will:

- Ensure that the Supporting Pupils with Medical Conditions Policy is developed and all staff are aware of the policy and that they understand their role in implementing the policy.
- Ensure that all staff who need to know are aware of a child's condition
- Ensure that sufficient trained numbers of staff are available to implement the policy and deliver against all the individual healthcare plans, including in contingency and emergency situations.
- Have overall responsibility for the development and monitoring of individual healthcare plans.
- Ensure that all staff are appropriately insured to support pupils in this way.
- Liaise with the school nurse in respect of a child who has a medical condition, including in cases where the situation has not yet been brought to the attention of the school nursing service.
- Make sure appropriate risk assessments and health care plans are completed
- Ensure all pupils with medical conditions, including those transferring into the school, have the appropriate support.
- Comply with any requirements that are imposed by the Local Authority to assist them with the discharge of their duties such as making a referral to the Alternative tuition service or providing work for students to complete at home.

3. School Staff

Any member of the school staff may be asked to provide support to pupils with medical conditions, including the administration of medicines, although they cannot

be required to do so. Although administering medicines is not part of a teacher's professional duties, they should take into account the needs of pupils with medical conditions they teach. Any member of school staff should know what to do and respond accordingly when they become aware that a pupil with a medical condition needs help.

4. Parent

Parents should provide the school with sufficient and up-to-date information about their child's medical needs. At Churchill School, parents are seen as key partners and they will be involved in the development and review of their child's individual healthcare plan, and may be involved in its drafting. Parents should carry out the action they have agreed to as part of its implementation, e.g. Provide medicines and equipment and ensure they or another nominated adult are contactable at all times.

5. Pupils

Pupils with medical conditions may be best placed to provide information about how their condition affects them.

If it is deemed, after discussion with the Parents/Carers, that a child is competent to manage their own health needs and medicines, the school will encourage them to take responsibility for managing their own medicines and procedures. This will be reflected within Individual Health Care Plans. Wherever possible, children should be allowed to carry their own medicines and relevant devices or should be able to access their medicines for self-medication quickly and easily; these will be stored in the cupboard in the Medical Room to ensure that the safeguarding of other children is not compromised. The school also recognises that children who can take their medicines themselves or manage procedures may require an appropriate level of supervision. If a child is not able to self-medicate then relevant staff should help to administer medicines and manage procedures for them. If a child refuses to take medicine or carry out a necessary procedure, staff should not force them to do so but instead follow the procedure agreed in the Individual Health Care Plan. Parents/Carers should be informed, outside of the review, so that alternative options can be considered.

6. School Nurses

Every school has access to school nursing services. They are responsible for notifying the school when a child has been identified as having a medical condition which will require support in school. Wherever possible, they should do this before the child starts at the school. They would not usually have an extensive role in ensuring that schools are taking appropriate steps to support children with medical

conditions, but may support staff on implementing a child's individual healthcare plan and provide advice and liaison, for example on training. School nurses can liaise with lead clinicians locally on appropriate support for the child and associated staff training needs. Community nursing teams will also be a valuable potential resource for a school seeking advice and support in relation to children with a medical condition.

7. Other Health Care professionals

Other healthcare professionals, including GPs and paediatricians, should notify the school nurse when a child has been identified as having a medical condition that will require support at school. They may provide advice on developing individual healthcare plans. Specialist local health teams may be able to provide support in schools for children with particular conditions (e.g. asthma, diabetes, epilepsy).

8. Local Authorities

Local authorities are commissioners of school nurses. They have a duty to promote co-operation between relevant partners – such as governing bodies of maintained schools, proprietors of academies, clinical commissioning groups and NHS England – with a view to improving the wellbeing of children with regard to their physical and mental health, and their education, training and recreation. Local authorities and clinical commissioning groups **must** make joint commissioning arrangements for education, health and care provision for children and young people with SEN or disabilities. Local authorities should provide support, advice and guidance, including suitable training for school staff, to ensure that the support specified within individual healthcare plans can be delivered effectively. Local authorities should work with schools to support pupils with medical conditions to attend full-time.

9. Clinical Commissioning Groups

Clinical commissioning groups commission other healthcare professionals such as specialist nurses. They should ensure that commissioning is responsive to children's needs, and that health services are able to co-operate with schools supporting children with medical conditions. They **must** make joint commissioning arrangements for education, health and care provision for children and young people with SEN or disabilities (as described above for local authorities). Children in special schools in particular may need care which falls outside the remit of local authority commissioned school nurses, such as gastrostomy and tracheostomy care, or postural support. Clinical commissioning groups should ensure their commissioning arrangements are adequate to provide the ongoing support essential to the safety of these vulnerable children whilst in school.

10. Providers of Health Services

Providers of health services should co-operate with schools that are supporting children with a medical condition, including appropriate communication, liaison with school nurses and other healthcare professionals such as specialist and children's community nurses, as well as participating in locally developed outreach and training. Health services can provide valuable support, information, advice and guidance to schools, and their staff, to support children with medical conditions at school.

11. Ofsted

Ofsted's new common inspection framework came into effect on 1 September 2015, aimed at promoting greater consistency across inspection remits. Inspectors must consider how well a school meets the needs of the full range of pupils, including those with medical conditions. Key judgements will be informed by the progress and achievement of these children alongside those of pupils with special educational needs and disabilities, and also by pupils' spiritual, moral, social and cultural development.

Staff Training and Support

Training needs for staff will be assessed by looking at the current and anticipated needs of pupils already on the roll. It may be possible to determine training needs by early information relating to a child about to be admitted to the school. All members of staff providing support to a child with medical needs will have been trained beforehand. Staff who provide support to pupils with medical conditions will be included in meetings where this is discussed.

The type of training, and frequency of refresher training, will be determined by the actual medical condition that a child may have and this will be supported by the Governing Body. Some training may be arranged by the school, and other types may make use of the skills and knowledge provided by the school nurse service, or specialist nurse services, among others. Other training may involve on-site or off-site provision. Parents will be asked to supply specific advice and then this will be reinforced with healthcare professional advice.

All staff (including supply staff) will be made aware of the specific needs of each child with a medical condition and will be competent and confident enough to deliver the support.

It must be noted that a First Aid certificate alone will not suffice for training to support children with medical conditions.

Managing medicines on school premises

Where clinically possible, medicines should be prescribed in dose frequencies which enable them to be taken outside school hours. Where this is not possible, the following will apply:

- Medicines will only be administered at school when it would be detrimental to a child's health or school attendance not to do so.
- No child will be given prescription or non-prescription medicines without their parent's written consent – except in exceptional circumstances where the medicine has been prescribed to the child without the knowledge of the parents.
- Non-prescription medicines will be administered by parents, should they be needed during the school day. For the administering of non-prescription medicines during an educational visit, parents should provide written consent.
- No child will be given a medicine containing aspirin unless it has been prescribed by a doctor. Parents will be required to give their written consent.
- The school will only accept prescribed medicines that are in-date, labelled, provided in the original container, as dispensed by the pharmacist, and include instructions for administration, dosage and storage. The exception to this is insulin which must be in-date, but will generally be available to schools inside an insulin pen or pump, rather than its original container.
- Medicines will be stored safely. This may be in the First Aid Room or in a fridge in the staff room. Some medicines may be stored in classroom store rooms. Children who need to access their medicines immediately, such as those requiring asthma inhalers, will be shown where they are. On educational visits, medicines will also be available and they will be looked after by a relevant member of staff.
- If a controlled drug has been prescribed, it will be kept securely and stored in a non-portable container. Named staff only will have access to such medication so that it can be administered to the specific child. The school will keep a record of doses administered, stating what, how and how much was administered, when and by whom. Any side effects of the medication to be administered will be noted
- When no longer required, medicines should be returned to the parent to arrange for safe disposal.

Written records will be kept of all medicines administered to children and parents will be informed if their child has been unwell at school.

Emergency Procedures

A child's individual healthcare plan will clearly define what constitutes an emergency and the action to be taken, including ensuring that all relevant staff are aware of emergency symptoms and procedures. It may be necessary to inform

other pupils in general terms so that they can inform a member of staff immediately if they think help is needed.

If a child is taken to hospital, staff should stay with the child until the parent arrives, or accompany a child taken to hospital by ambulance. Accurate information about the child will be provided to the emergency services at the call out stage, during any first response stage, or subsequent moving on to hospital.

Educational Visits and Sporting Activities

The school will consider how a child's medical condition will impact on their participation. We will encourage all children to participate according to their ability and make any necessary reasonable adjustments, unless evidence from a clinician, such as a GP, states that this is not possible.

The school will consider what reasonable adjustments may need to be made after carrying out a risk assessment so that planning arrangements take account of any steps needed to ensure that children with medical conditions are included. This will require consultation with parents and pupils and advice from the relevant healthcare professional to ensure that pupils can participate safely.

Unacceptable Practice

Although school staff should use their discretion and judge each case on its merits with reference to the child's individual healthcare plan, it is not generally acceptable practice to:

- Prevent children from easily accessing their inhalers and medication and administering their medication when and where necessary;
- Assume that every child with the same condition requires the same treatment;
- Ignore the views of the child or their parents; or ignore medical evidence or opinion, (although this may be challenged);
- Send children with medical conditions home frequently or prevent them from staying for normal school activities, including lunch, unless this is specified in their individual healthcare plans;
- If the child becomes ill, send them to the school office or medical room unaccompanied or with someone unsuitable;
- Penalise children for their attendance record if their absences are related to their medical condition e.g. Hospital appointments;
- Prevent pupils from drinking, eating or taking toilet or other breaks whenever they need to in order to manage their medical condition effectively;
- Require parents, or otherwise make them feel obliged, to attend school to administer medication or provide medical support to their child, including with toileting issues. No parent should have to give up working because the school is failing to support their child's medical needs; or

- Prevent children from participating, or create unnecessary barriers to children participating in any aspect of school life, including educational visits, e.g. by requiring parents to accompany the child.

Liability and Indemnity

The Governing Body at Woodhall Primary School ensures that appropriate insurance is in place and that it reflects the level of risk. The insurance covers staff providing support to pupils with medical conditions. From time to time, the school may need to review the level of cover for health care procedures and any associated related training requirements.

Complaints

Should parents/carers be dissatisfied with the support provided they should discuss their concerns directly with the school. If for whatever reason this does not resolve the issue, they may make a formal complaint via the complaints procedure outlined in the school's Complaints Policy.

Annex A

Model Process for Developing Individual Health Care Plans
